HIGHLIGHTS

Automatic cleaning

Thanks to the automatic cleaning and automatic descaling, you are guaranteed a perfect and hygienic Espresso every day and prolong the lifetime of your Gaggia Espresso machine.

Durable ceramic grinder

Because a metal grinder might burn the coffee beans while grinding, all Gaggia's Espresso machines are equipped with an extremely durable ceramic grinder. A ceramic grinder will retains the purity of the coffee aroma while being equally durable to a metal grinder. Additionally the coffee grind can be adjusted from coarse to fine, just as you prefer.

Descaling alarm

Your Gaggia machine will indicate when a descale cycle becomes necessary. Descaling will prolong the lifetime of your Espresso machine significantly and should only be completed with original Gaggia descaler.

Digital display

Whatever you want to do with your Gaggia - the digital display makes navigation much easier and gives instant feedback on the status of your Espresso machine.

Ground coffee compartment

The ground coffee compartment allows you to brew a different blend of coffee without changing the beans. Simply switch your Espresso machine to ground coffee and fill the amount for one Espresso into the compartment.

Pre-brewing

Pre-brewing ensures that the ground coffee is evenly moistened before the actual brewing process. Only then the water flows through all of the ground coffee and your Gaggia Espresso machine can extract the full aroma for a balanced and tasty Espresso.

Removable brewing group

The removable brewing group in your full-automatic Espresso machine allows for easy cleaning and maintenance and can even be replaced separately if necessary. This saves money and increases the machine hygiene for a flawless coffee taste.
